• PROFILE

Senior Product Owner & Technical Consultant, eMBA with 10+ years leading AI/ML-driven SaaS platforms in fintech and biotech. Expert in business analysis, AWS, Agile SDLC, and cross-functional team leadership, delivering 20%+ efficiency gains.

• EMPLOYMENT HISTORY

• Senior consultant, Technical Product Owner at Sii

August 2023 — Present

Business analysis, discovery, prioritisation, facilitation and backlog management.

- PO in Prometheus Group (from Aug 2024),
 - leading three teams.
 - building from scratch an AI/ML enhanced workflow that brings 100%-500% time and money saving in MDaaS process by directing development in Event Driven Architecture in Kubernetes and AWS.
 - leading the project to increase customer retention by 10% in the MDaaS business line by revitalizing the Client application.
- PO in Sartorius AG (until Aug 2024), building the platform for Umetrics Studio, cloud native Kubernetes application supporting biotechnological R&D.

• Agile Product Manager at Codenotary

May 2022 — July 2023

Spearheaded defining and development of all Codenotary's IT products, such as vault.immudb.io, sbomcenter.io, Trustcenter, and Opvizor.

• Scrum Product Owner at Santander Bank Polska, Poznań

February 2019 — April 2022

- Boosted retail credit sales in digital channels by 20% by implementing risk policies, optimizing user workflows and integrating real-time analytics tools.
- Implemented KNF recommendations through use case definition and business analysis.
- Successful cooperation in an intra-bank group on implementation of emergency anti-Covid measures.
- Drove 15% increase in customer retention by leading customer feedback integration into product roadmaps, reducing feature delivery time by 25% via Jira automation.

• PM / Agile Product Owner at BZ WBK, Wrocław

August 2015 — January 2019

- Streamlined project portfolio management for Risk Division, reducing delivery timelines by 25% through Agile prioritization frameworks.
- Drove enhancements to the Customer Analytical Repository, providing data for CRM and Risk and increasing current data availability by 300%.
- Directed team of 15 data analysts and developers during Santander-Deutsche Bank merger, achieving 100% uptime and significant NPL reduction.

◦ **Specialist / Manager at BZ WBK, Poznań**

August 2005 — July 2015

- Held various roles in reporting and decision systems development, advancing to a management position in 2009.
- Oversaw current validation of Credit Risk scorecards.
- Test Leader in Risk stream during the merger with Kredyt Bank.
- Conducted business analysis, communicated requirements to Java developers, and managed Decision Engine development.
- Reduced operational costs by 20% by leading business initiative to migrate Bank's Decision Engine from CGI to AbInitio, enhancing processing speed by 30%.
